

# COOLPIX A1000

STYLISH DESIGN.  
HIGH-POWER ZOOM

The COOLPIX A1000 has a 35x optical zoom and 70x Dynamic Fine Zoom, in a compact sophisticated camera body. Featuring a tilting touch LCD screen along with high resolution electronic viewfinder which provides greater visibility in any shooting conditions.

The 16-megapixel effective resolution offers high image quality even in dark situations with the optimal balance between high resolution and low light sensitivity, achieving a maximum ISO of 6400 for still images and video in any lighting. The new compact body also features addition zoom controls for precise operation and supports movie recording of 4K Ultra High Definition videos up to 30 frames per second.

The COOLPIX A1000 features a versatile 35x Optical Zoom (24 to 840mm 35mm eq) making it a perfect travel companion. Images and video are kept steady by a hybrid VR system combining optical and electronic image stabilization.

The 16mp backlit sensor offers an excellent combination of resolution and low light sensitivity. The COOLPIX A1000 also has the ability record images in RAW (NRW) format, enabling a wider range of post-production and creative image editing.

A new addition to the COOLPIX A1000 is a 0.5cm 1,163m-Dot Electronic Viewfinder, which features an eye sensor to automatically switch between the viewfinder and the LCD screen.

The COOLPIX A1000's large 3-in, tilting touch sensitive LCD makes it easy to compose your shots and monitor your video recording.

An anti-reflection coating provides a bright screen that allows clear visibility even in sunlight.

Capture video in the awe-inspiring resolution of 4K Ultra HD. Face-priority AF keeps focus where you want it, and a Hybrid VR keeps videos tripod-steady.

Create stunning time-lapse sequences with ease using the preset modes.

Share your images seamlessly and automatically to a smart device via a low energy Bluetooth connection. The COOLPIX A1000 can also be operated remotely for stills and video via Wi-Fi using Snapbridge.
